

SORA Test Plugs

Test Plugs are installed on pipework to allow convenient access for pressure and temperature testing equipment. **SORA Brass Binder Test Plug** reduce the need to install expensive fixed temperature and pressure gauges in a pipeline. A single plug can be used for both temperature and pressure readings using hand held test gear that is typically more accurate than low cost fixed gauges found in installations

Speed of operation is the biggest advantage of Brass Binder Test Plug. Remove the cap, insert the probe, take the reading and replace the cap. The unique core design prevents leakage or jetting when the probe is removed. The Cap protects the entry point and permanent strap protects loss of the Cap.

Brass Binder Test Plug, 1/4" BSPT

PRODUCT SPECIFICATION

Connection: 1/4" Thread BS21 (EN 10226-2)

Working Pressure: Max. 3500Kpa (500Psi)

Working Temperature: -10 ~130°C

Product Construction:

PART	MATERIAL	STANDARD
CAP	BRASS	EN12165 CW602N
WASHER	EPDM	
BODY	BRASS	EN12165 CW602N
TIE	POLYPROPYLENE	
SEAL	EPDM
